

Dear Lasik Patient:

Thank you for your interest in laser vision correction at Buckley Vision Institute. The information in this package is designed to provide some preliminary information about laser vision correction. This is a comprehensive subject and there is a lot to learn about it. There are several providers of Lasik surgery in the Front Range area, and all are quite different considering experience of the surgeon, the technology that is used to determine your candidacy, and the level of service that you can expect.

We are proud to be the only center in Southern Colorado to offer our exclusive 20/20 Money Back Guarantee for Lasik. Although not every patient qualifies for the advanced technology that this plan incorporates, about 90 percent of our patients do qualify. And for those that choose our 20/20 plan most achieve visual outcomes that are better than 20/20! This level of visual acuity was unheard of before the advent of the VISX wavefront technology, which is called CustomVue[®]. And CustomVue wavefront is far more accurate and produces significantly better results than any other wavefront guided laser in America! CustomVue[™] is what makes it possible to offer our exclusive 20/20 Money Back Guarantee!

At Buckley Vision Institute we practice what we call: "Personalized LasikSM". We call it Personalized Lasik because of the individualized treatment that each patient receives from your consultation or seminar all the way through your post op visits. All our co managing doctors practice this individualized treatment as well. We understand the importance of treating each patient as an individual and responding accordingly to his or her needs.

There is no substitute for experience. Dr. Buckley has been a part of the Colorado Springs community since 1985, and since then has performed over 21,000 vision correction procedures. This experience, together with the most advanced diagnostic and laser technology, together with personal attention to every detail, makes it possible to offer our 20/20 money back guarantee.

Please contact your co managing doctor to schedule a personal consultation and examination. Our goal is to provide you with the most personalized service and quality care possible. In the days leading up to your surgery, please feel free to contact us with any questions you may have. Our consultants can be reached at: 719-444-3000.

Thank you again for your interest in laser vision correction at Buckley Vision Institute. We look forward to providing you with total visual freedom!

Sincerely,

A handwritten signature in black ink, appearing to read 'Jim Van Dyke', written in a cursive style.
